  - http://ec2-3-15-222-198.us-east-2.compute.amazonaws.com:3000/api/courses/{id}

### Clean code:

```
const express = require('express');
const cors = require('.cors');
const userRoutes = require('./routes/userRoutes');
const userRoutes2 = require('./routes/userRoutes2');
const courseRoutes = require('./routes/courseRoutes');
const authRoutes = require('./routes/authRoutes');
const rolesRoutes = require('./routes/rolesRoute');
```

Some variables are not clear enough

```
// Llamar la función (ejemplo)
// enviarCorreo(
// "wmconya@espe.edu.ec",
// "Hola desde Node.js",
// "Este es un mensaje enviado desde Node.js usando SMTP y Nodemailer"
// );
```

Commented Unused code

```
document.getElementById('addUserForm').addEventListener('submit', async (event) => {
    event.preventDefault();
    const formData = new FormData(event.target);

try {
    const response = await fetch('../controller/add_users.php', {
        method: 'POST',
        body: formData
    });
    const result = await response.json();

if (result.success) {
    alert('Usuario agregado correctamente');
    cargarUsuarios();
    const modal = bootstrap.Modal.getInstance(document.getElementById('addUserModal'));
    modal.hide();
    } else {
        alert('Error al agregar usuario: ' + result.message);
    }
} catch (error) {
    console.error('Error al agregar usuario:', error);
}
});
```
